

## TERRACE HEATING

# Outdoor Heatpanel 2400

With the Eurom Outdoor Heatpanel 2400 RC you can enjoy the nice summer evenings until late at night. The Outdoor Heatpanel emits no light, but does create a pleasant warmth with the capacity of 2400 Watts.

With the supplied remote control the Outdoor Heatpanel can easily be turned on and off. The Heatpanel can be attached both to the wall and the ceiling, and is splash proof (IPX4).

Tip: the Outdoor Heatpanels are most suitable for in (half) closed terraces. In completely open terraces the warmth from the Heatpanel will fly away quicker.

Productnummer	334395
Power	2400 W
Connection voltage	230/50 V/Hz
Isolation class	IPX4
Range	15 – 20 m <sup>2</sup>
Control	control panel, remote control
